CHARITABLE REUSE THROUGH IRN

The Best Option for Excess Furniture

WHY IS REUSE IMPORTANT?

Every organization in the U.S. has furniture that's no longer needed.

Around the world, and in the U.S., there are millions of people in desperate need of furniture, because of natural disaster, civil conflict, or endemic poverty.

There's plenty of supply, and nearly infinite demand, but no connection.

UNTIL...

IRN MAKES THE CONNECTION

WHAT KIND OF FURNISHINGS?

Focus on Education,
Residential, Healthcare.

***If you can imagine it
being used again, we
can use it.***

Santa Clara, CA

Classrooms, Science Labs, Residential Furnishings, Lounges, Administrative Offices, Seating, Conference/Training Facilities, Patient Rooms, Doctors Offices, Kitchens, Cafeterias, Libraries

HOW IRN WORKS

- 1) Inventory
- 2) Plan
- 3) Project

Loading Furniture for Shipment
(Princeton University)

1

Inventory

IRN uses the inventory to make the best match with recipient(s).

2

Plan

Labor. Schedule. Site. Budget. Logistics.

3

Do the Project

Empty the building(s). Load trailers. Send them to kids & families in need.

IS IT COMPLICATED?

No! It's as easy as throwing stuff away, instead of dumpsters IRN brings trailers!

Provide us Inventory

You provide us with an inventory of all the furnishings you would like removed

Provide you a Quote

We provide you with a quote of the cost of the removal

Complete Removal

We complete the removal and maximize waste diversion by redistributing as much as possible

WHAT'S THE COST?

While impacted by geography, inventory composition, and schedule, the cost for IRN reuse services is typically comparable to the cost an organization would otherwise pay for disposal landfill disposal.

DETAILS:

- *The labor force needed to remove furniture from a building and load it onto donation trailers is virtually the same as the labor force needed to load it into dumpsters or moving trucks destined for the landfill, and sometimes it's less. This is because when loading donation trailers, the mover's responsibility ends when each piece enters the trailer.*
- *IRN trailers cost the same or less than dumpsters or moving trucks destined for the landfill.*
- **NOTE:** *Transportation fees are shared by the generator and the nonprofit agency such that the recipient children and families receive the furniture at no cost.*

DOCUMENTATION

*Exactly what you shipped.
Exactly where it went.*
